## Quotation

For: International Diamond Services Date: October 12, 2005

Attn: Pat Hicks Phone: 713-681-5485 Fax: 713-681-1640

<u>Description of Work to be Performed:</u>
Transportation and disposal/Recycle of non-hazardous drums at the International diamond services facility in Houston, TX. LOAD #1-93 Drums

**Estimated Costs for Completion of Work:** 

Analysis (4) @ \$375/each	\$1,500.00	
Transportation @ \$65/hr		
(Estimated 6 hours)	\$ 390.00	
Disposal/Recycle Non-Hazardous	÷	
Diamond Bearing Liquids @ \$50/dm (54)	\$2,700.00	
Disposal of Non-Hazardous Waste		
Filter Cake Solids @ \$50/dm (3)	\$ 150.00	
Disposal of Non Hazardous Waste		
Lapping Sludge @ \$55/dm (15)	\$ 825.00	
Disposal of Non-Hazardous Waste		
Mega Sludge @ \$55/dm (21)	\$1,155.00	
Fuel Surcharge @ .14% of Transportation	\$ 210.00	
Estimated Total	\$6,930.00	

<sup>\*\*\*</sup>Estimate assumes that all waste will be Non-Hazardous.

Pat,

I agreed with Bob to lower your price on the lapping sludge drums from \$60 to \$55 because some of the drums have free liquids and some do not. Instead of charging \$60 for the ones that are wet and \$50 for the solids, I just split it in the middle. Bob is aware. Call with any questions.

<sup>\*\*\*</sup>Drums must be DOT shippable.

<sup>\*\*\*</sup>Thank you for your interest in CES Environmental Services.

EPAHO085000581

Bill Of Lading #:

88105

Folder ID :   international Diamond Services(IDS Recycle Caustic & Kinder Morgan	international Diamond Services(IDS-Houston,TX)						
Original – Shipper Provided Short Form St	raight Bill of Lading – Not Negotiable – Domestic						
SHIPPED FROM:	CES#						
International Diamond Services	11a) PA-2674						
3420 Pinemont	The state of the s						
Houston, TX 77018	11c)						
(713) 681-5485	11c)						

The properly described below, in apparent good order, except as noted (content and condition of packages unknown), marked, consigned, and destined as indicated below, which said carrier (the word carrier being understood throughout this as meaning any person or corporation authorized to be in possession of the properly under the contract) agrees to carry to its unusual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of sill or as to any said over all or any portion of said route to destination, and as to each party at any time interested in all or any of said properly, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shipper and carrier or intermediary.

For payment: Charges to be billed to Shipper or the "Billed to" party are set forth in the governing contract with Shipper. No charges other than those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

CONSIGNED TO:

**CES Environmental (Port Arthur)** 

2420 Gulfway Dr.

Port Arthur, TX 77640

CARRIER:

CES Environmental Services, Inc.

4904 Griggs Rd.

Houston, TX 77021

This is to certify that the product stated below are properly classified, described, packaged, marked and labeled and is in proper condition for transportation according to the applicable regulations of the Department of Transportation. If this Shipment moves between to ports by a certier by water, the law requires that the Bill of Lading shall state whether it is "carrier's or shipper's weight."

Intermodal Certificate: All Information required by Federal Highway Administration regulations at 49 CFR 330.64© Implementing the Intermodal Safe Container Act of 1932 is set forth on the face of this bill of lading. The shipper name herein is the tendering party.

The property described below, in apparent good order, except as noted (content and condition of packages unknown), merked, consigned, and destined as indicated below, which said cernic (the word cernic being understood throughout this as meaning any person or corporation authorized to be in possession of the property under the contract) agrees to carry to its unusual place of delivery at said destination. If on its route, otherwise to deliver to another carrier on the route to said destination. This Bill of Lading is a receipt for goods; it is not of itself a contract of carriage. It is mutually agreed, as to each carrier of all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions contained in the applicable contract between shapper and carrier or intermediary.

For payment Charges to be blied to Shipper or the "Silled to" party are set forth in the governing contract with Shipper. No charges other train those contained therein may be billed to Shipper or the "Billed to" party without prior written consent of Shipper. The extra copy of this Bill of Lading, furnished at the time of shipment, must be attached to the freight bill submitted to Shipper or the "Billed to" party and sent to:

#### Generator Receptification Statement

Generator hereby certifies that the components in this waste stream and the process generating this waste stream remain the same as when issued the above-listed Liquid Environmental Solutions Profile Number. Generator hereby certifies that in the event there are any changes to the waste stream components or the process generating the waste, LES will be notified prior to disposing of any changed waste at the LES Disposal facility until all necessary analytical data or other required documentation is submitted for review and the changes have been approved for waste disposal.

I certify that the above information is complete and accurate to the best of my knowledge and ability to determine, that no deliberate or willful omission of composition or properties exists, and that all known or suspect hazards have been disclosed and that the waste is not designated a Hazardous Waste as defined by the US EPA per CFR 261.3 or contains PCB's regulated by TSCA 40 CFR 761.

## **Material / Product Approval Letter**

Date 12/31/2008

Dear Brian Codd

Thank you for choosing CES Environmental Services, Inc. for your material / product recycling needs. The following material has been approved at our facility in Houston, TX. If the material received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3127

Expiration Date 12/31/2010

Producer: Infineum

Address: Park & Brunswick Avenues

Linden, NJ 07036

Material / Product Information

Name of Material / Product C9403

**Container Type:** 

steamed rail car

Detailed Description of Process Generating or Producing the Material / Product:

Petroleum product additives

Color: varies

Odor: mild petroleum

**pH**: 5-9

**Physical State:** 

**Incompatibilities:** excessive heat and strong oxidizers

Safety Related Data/Special Handling:

material will be heated - wear appropriate PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President

CES Environmental Services, Inc.

Review Cost of pay 5.50/salla night Joe C.

## MATERIAL SAFETY DATA SHEET

**SECTION 1** 

PRODUCT AND COMPANY IDENTIFICATION

**PRODUCT** 

Product Name: Infineum C9403

Product Description: Petroleum Product Additive

Product Code: 32433100 Intended Use: Lube oil additive

**COMPANY IDENTIFICATION** 

Supplier: INFINEUM USA L.P.

P.O. Box CN 135

Linden, NJ. 07036 USA

24 Hour Health Emergency **Transportation Emergency Phone** 

**Product Technical Information** 

800-654-1233 **Supplier General Contact** 800-654-1233

Color is off Pipsamide Pip Malleated Amine

**SECTION 2** 

#### **COMPOSITION / INFORMATION ON INGREDIENTS**

800-726-2015

800-424-9300

No Reportable Hazardous Substance(s) or Complex Substance(s).

**SECTION 3** 

#### HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

#### POTENTIAL PHYSICAL / CHEMICAL EFFECTS

Contact with hot material can cause thermal burns which may result in permanent damage. Thermal burn hazard - contact with hot material may cause thermal burns.

#### POTENTIAL HEALTH EFFECTS

May be irritating to the eyes, nose, throat, and lungs. Excessive exposure may result in eye, skin, or respiratory irritation.

NFPA Hazard ID:

Health:

Flammability: 1

Reactivity: 0

**HMIS Hazard ID:** 

Health:

Flammability: 1

Reactivity: 0

NOTE: This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

**SECTION 4** 

#### **FIRST AID MEASURES**

#### INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek

Revision Date: 03Jul2008

Page 2 of 9

immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation. Immediately remove from further exposure. Get immediate medical assistance. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Give supplemental oxygen, if available. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

#### SKIN CONTACT

Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse. For hot product: Immediately immerse in or flush affected area with large amounts of cold water to dissipate heat. Cover with clean cotton sheeting or gauze and get prompt medical attention.

#### **EYE CONTACT**

Flush thoroughly with water. If irritation occurs, get medical assistance.

#### **INGESTION**

Give one or two glasses of water if patient is alert and able to swallow. Seek immediate medical attention. Do not induce vomiting.

#### **SECTION 5**

#### **FIRE FIGHTING MEASURES**

#### **EXTINGUISHING MEDIA**

**Appropriate Extinguishing Media:** Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

#### **FIRE FIGHTING**

**Fire Fighting Instructions:** Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Carbon dioxide, Carbon monoxide, Smoke, Fume, Nitrogen oxides

#### FLAMMABILITY PROPERTIES

Flash Point [Method]: >150C (302F)

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

**Autoignition Temperature: N/D** 

#### **SECTION 6**

#### **ACCIDENTAL RELEASE MEASURES**

#### **NOTIFICATION PROCEDURES**

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

Revision Date: 03Jul2008

Page 3 of 9

#### SPILL MANAGEMENT

**Land Spill:** Stop leak if you can do it without risk. Small Spills: Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. If liquid is too viscous for pumping, scrape it up with shovels into a suitable container for recycle or disposal.

**Water Spill:** Stop leak if you can do it without risk. Confine the spill immediately with booms. Warn other shipping. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material; however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

#### **ENVIRONMENTAL PRECAUTIONS**

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

#### **SECTION 7**

#### HANDLING AND STORAGE

#### **HANDLING**

Avoid all personal contact. Avoid contact with skin. Prevent small spills and leakage to avoid slip hazard. Products may load from Infineum manufacturing site above the standard loading/unloading range.

Loading/Unloading Temperature: 45°C (113°F) - 55°C (131°F)

**Transport Temperature:** N/D **Transport Pressure:** [Ambient]

Static Accumulator: This material is not a static accumulator.

#### **STORAGE**

Do not store in open or unlabelled containers.

Storage Temperature: 45°C (113°F) - 55°C (131°F)

Storage Pressure: [Ambient]

**Suitable Containers/Packing:** Drums; Tank Cars; Tank Trucks; Bulk Containers **Suitable Materials and Coatings:** Carbon Steel; Stainless Steel; Zinc; Epoxies

Unsuitable Containers/Packing: Butadiene and styrene rubbers; Natural and butyl rubbers

Unsuitable Materials and Coatings: Rubber; Polyethylene; Butyl Rubber; Butadiene Rubber; Styrene

Rubber

**SECTION 8** 

**EXPOSURE CONTROLS / PERSONAL PROTECTION** 

Revision Date: 03Jul2008

Page 4 of 9

**Exposure limits/standards for materials that can be formed when handling this product:** When mists / aerosols can occur, the following are recommended: 5 mg/m³ - ACGIH TLV, 10 mg/m³ - ACGIH STEL, 5 mg/m³ - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

#### **ENGINEERING CONTROLS**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

#### PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

**Respiratory Protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

**Hand Protection:** Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Thermally protective, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves. If prolonged or repeated contact is likely, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves.

**Eye Protection:** If contact is likely, safety glasses with side shields are recommended. If contact with material may occur, safety glasses and face shield are recommended.

**Skin and Body Protection:** Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

If prolonged or repeated contact is likely, chemical, and oil resistant clothing is recommended. If product is hot, thermally protective, chemical resistant apron and long sleeves are recommended.

**Specific Hygiene Measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Revision Date: 03Jul2008

Page 5 of 9

#### **ENVIRONMENTAL CONTROLS**

See Sections 6, 7, 12, 13.

#### **SECTION 9**

#### PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

**GENERAL INFORMATION** 

Physical State: Liquid

Color:

Odor: Mild Petroleum/Solvent

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

**Relative Density (at 15.6 C):** 0.93 15.6°/15.6C

Density (at 15 °C): 930 kg/m³ (7.76 lbs/gal, 0.93 kg/dm³)

Flash Point [Method]: >150C (302F)

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

**Autoignition Temperature: N/D** 

Boiling Point / Range: >= 260C (500F)

Vapor Density (Air = 1): N/D

**Vapor Pressure:** 

Evaporation Rate (n-butyl acetate = 1): [Negligible ]

pH: N/D

Log Pow (n-Octanol/Water Partition Coefficient): N/D

Solubility in Water: Negligible.

Viscosity: 10000 cSt (10000 mm2/sec) at 40 C | 200 cSt (200 mm2/sec) at 100C

Oxidizing Properties: See Sections 3, 15, 16.

**OTHER INFORMATION** 

Freezing Point: N/D Melting Point: N/D Hygroscopic: No

Coefficient of Thermal Expansion: 0.00069 %

**SECTION 10** 

#### STABILITY AND REACTIVITY

STABILITY: Material is stable under normal conditions.

**CONDITIONS TO AVOID:** Excessive heat.

MATERIALS TO AVOID: Strong oxidizers

**HAZARDOUS DECOMPOSITION PRODUCTS:** Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

Revision Date: 03Jul2008

Page 6 of 9

**SECTION 11** 

#### TOXICOLOGICAL INFORMATION

#### **ACUTE TOXICITY**

Route of Exposure	Conclusion / Remarks				
Inhalation					
Toxicity: LC50 > 5 mg/l	Minimally Toxic.				
Irritation: No end point data.	Elevated temperatures or mechanical action may form vapors, mist, or fumes which may be irritating to the eyes, nose, throat, or lungs.				
Ingestion					
Toxicity: LD50 > 2000 mg/kg	Minimally Toxic.				
Skin					
Toxicity: LD50 > 2000 mg/kg	Minimally Toxic.				
Irritation: No end point data.	Mildly irritating to skin with prolonged exposure.				
Eye					
Irritation: No end point data.	May cause mild, short-lasting discomfort to eyes.				

Additional information is available by request.

The following ingredients are cited on the lists below: None.

-- REGULATORY LISTS SEARCHED--

5 = IARC 2B

2 = NTP SUS

4 = IARC 2A

6 = OSHA CARC

#### **SECTION 12**

#### **ECOLOGICAL INFORMATION**

The information given is based on data available for the material, the components of the material, and similar materials.

#### **ECOTOXICITY**

Material -- Not expected to be harmful to aquatic organisms.

#### **SECTION 13**

#### **DISPOSAL CONSIDERATIONS**

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

Revision Date: 03Jul2008

Page 7 of 9

#### **DISPOSAL RECOMMENDATIONS**

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised incineration at very high temperatures to prevent formation of undesirable combustion products.

#### REGULATORY DISPOSAL INFORMATION

RCRA Information: Disposal of unused product may be subject to RCRA regulations (40 CFR 261). Disposal of the used product may also be regulated due to ignitability, corrosivity, reactivity or toxicity as determined by the Toxicity Characteristic Leaching Procedure (TCLP). Potential RCRA characteristics: CORROSIVITY.

**Empty Container Warning** Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

#### **SECTION 14**

#### TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

#### **SECTION 15**

#### REGULATORY INFORMATION

**OSHA HAZARD COMMUNICATION STANDARD:** When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

**EPCRA:** This material contains no extremely hazardous substances.

**CERCLA:** This material is not subject to any special reporting under the requirements of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). Contact local authorities to determine if other reporting requirements apply.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

**SARA (313) TOXIC RELEASE INVENTORY:** This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

The Following Ingredients are Cited on the Lists Below: None.

FYI: I would lean closer to the .50 price if I were you. It appears that this material is not very good quality and I am not having the response that I typically do on additives.

**Subject:** RE: C9403// RTC PLCX 224121

Let me know if I should be doing anything on this...if not I would rather stay out of it. Has a folder / P&L been done?

Thank You!

Looks like we have the deal. We will have to move the car to Dana and have them apply steam. I ball parked .50 to .75 cents. I will get the car rolling however let me know if there is anything further that you need.

Thanks,

Ken

Ken,

Please see discussion below. Please let Mike Kirk and I know where you would like to move the car and we will help make it happen.

make it nappe Thanks,

Nick

To: Barboza, Nicholas Cc: Codd, Brian Subject: FW: C9403

#### Nick:

To pursue this I need the car # and expect it is sitting at Econorail Leasetrack in Baytown TX. Also would need the location where CES wants the car spotted for steaming and emptying. Hopefully they will do this at a reputable transload facility so no safety issues.

Once you have this info I will help to bill the car there. This week is very busy for me but will do my best to help out.

#### Kind regards,

## Mike Kirk

Brian,

See pricing below.

Mike.

Can you advise on where the car is.

Thanks, Nick

**To:** Barboza, Nicholas **Subject:** RE: C9403

Nick,

Got the sample evaluated and looking for a concrete number however you can ball park between .50 to .75 cents per gallon plus the cost to move the car and apply steam. We would have to move the car somewhere close in the ship channel area. Have you been able to find a home for it?

Take care, Ken

Nick,

We are running out to Econorail tomorrow to pull a sample of the material. Should have something to you shortly.

Take Care, Ken

lo: Subject: Kara Disney RE: Infenium

No, we pay .30/gallon minus other charges. We got 1.25/gal. Also, get with Juanita before she sends them anything. Not sure, but I think they think we do not owe them anything. These guys would be hounding us by now about this, or we already paid it. Typically, they invoice the job the day they ship to us. This makes me think we paid already. Check on that and don't send anything till you get with me.

Thanks,
Dan Bowman

Subject: RE: Infinium Railcar

Julio,

Thanks for the pricing. We will go ahead and pay if we have to. Just move forward. The railcar is supposed to only have 14,000 gallons. We can pull 5500 each on the first 2 loads and the next load should take care of it. Just in case the customer requests you to clean the car after removal, go ahead and let me know what that would be.

Nicholas,

Dana has to bill us for the steam. We can take it out of what we will owe you for the product provided we revovery from the buyer. I'm sure it won't be a problem though. See cost estimate below. We should have out of the car on Friday. Do you want Dana to clean your car after the removal? Call me with any questions 713-854-6150.

Morgan,

Schedule some truck to pick this stuff up on Friday after 10 AM. We have to get it picked up and delivered that day. Get with Kim on the BOL. She also has an MSDS sheet on the material that would not require a signature because it is product. Make sure we get it all after the 3dr load.

Kim,

Get with me on this when you get a chance.

Javier,

We have to pick these up by Friday all 3 loads with clean trailers. The fewer tankers we use the better, provided we can get all 3 loads.

Dan

4/16/2009

Dan, We will be placing the R/C on steam this afternoon; we are projecting to have the R/C up to Temp by Friday late morning. You mentioned that you slid not wish to have the R/C steamed over the weekend; will 3 loads be enough to empty the R/C completely? If not, will we need to maintain the Temp over the weekend? The estimated cost for the initial steaming will be \$1,680.00. We will not however be able to do 3<sup>rd</sup> party billing, all steam charges must be billed to CES. If you have any further questions or concerns feel free to contact me.

Thanks,

Julio C.

Subject: Infinium Railcar

Mr. Cuellar,

Please put heat on the Infineum railcar. We need to get the car to 180 F. Infineum says they will pay for the steam. Nicholas Barboza from Infineum can verify at 908-474-3084. We need to pick up by Friday so we don't have to keep steam over the weekend. We will send 3 trucks on Friday to load the product. Let me know on Thursday when you think they will be ready on Friday. Hopefully no later than 10 AM. Also, his e-mail is up top. What do you think it will cost Infineum? If you don't believe it is possible to get car hot enough by Friday, I think we should wait to avoid Infineum having to keep paying for steam over the weekend.

Nicholas,

The buyer is ready to receive. Dana says it will take around 3 days to get it to 180 F. The loads will go out on Friday and we should be able to buy for at least .25/gal depending on the QC at the receiver. I am hoping more. The buyer is ready to take. Someone from Dana may contact you to verify payment for steam as we discussed last week.

Kim,

We need to schedule the 3 trucks on Friday to take to the buyer. If you need to call Dana on Thursday to verify they will be ready for pick-up Friday their number is 281-471-4700. Or, if you remind me, I can do it. I got that NC job and several other large one going this week so you may have to tug my shirt tail. Man I hope they can get it hot enough by Friday. Let me know when the car is empty so I can pass that information to Infineum so they can get their asset back.

Thanks all,

Dan

Nick,

Y'all should have your money very soon as I have expedited the second payment. Supposedly the back house was not communicating with the front house with the paper work. So, the accounting group did not know that the drums were actually received.

I am still working on the railcar what are you guys looking in so far as a pricing range for the material.

Take care,

Ken

**SECTION 2** 

COMPOSITION / INFORMATION ON INGREDIENTS

No Reportable Hazardous Substance(s) or Complex Substance(s).

**SECTION 3** 

HAZARDS IDENTIFICATION

This material is not considered to be hazardous according to regulatory guidelines (see (M)SDS Section 15).

#### POTENTIAL PHYSICAL / CHEMICAL EFFECTS

Thermal burn hazard - contact with hot material may cause thermal burns.

#### POTENTIAL HEALTH EFFECTS

Low order of toxicity. May be irritating to the eyes, nose, throat, and lungs. Excessive exposure may result in eye, skin, or respiratory irritation.

NFPA Hazard ID:

Health:

0

Flammability:

Reactivity: 0

HMIS Hazard ID:

Health:

Flammability:

Reactivity:

**NOTE:** This material should not be used for any other purpose than the intended use in Section 1 without expert advice. Health studies have shown that chemical exposure may cause potential human health risks which may vary from person to person.

**SECTION 4** 

FIRST AID MEASURES

#### INHALATION

Remove from further exposure. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. If respiratory irritation, dizziness, nausea, or unconsciousness occurs, seek immediate medical assistance. If breathing has stopped, assist ventilation with a mechanical device or use

Infineum D1282 Product Name:

Revision Date: 06Feb2008

Page 2 of 9

mouth-to-mouth resuscitation.

#### **SKIN CONTACT**

Wash contact areas with soap and water. Remove contaminated clothing. Launder contaminated clothing before reuse. For hot product: Immediately immerse in or flush affected area with large amounts of cold water to dissipate heat. Cover with clean cotton sheeting or gauze and get prompt medical attention.

#### **EYE CONTACT**

Flush thoroughly with water. If irritation occurs, get medical assistance.

#### **INGESTION**

First aid is normally not required. Seek medical attention if discomfort occurs.

#### **SECTION 5**

#### **FIRE FIGHTING MEASURES**

#### **EXTINGUISHING MEDIA**

Appropriate Extinguishing Media: Use water fog, foam, dry chemical or carbon dioxide (CO2) to extinguish flames.

#### **FIRE FIGHTING**

Fire Fighting Instructions: Evacuate area. Prevent runoff from fire control or dilution from entering streams, sewers, or drinking water supply. Firefighters should use standard protective equipment and in enclosed spaces, self-contained breathing apparatus (SCBA). Use water spray to cool fire exposed surfaces and to protect personnel.

Hazardous Combustion Products: Carbon dioxide, Carbon monoxide, Smoke, Fume, Nitrogen oxides, Sulfur oxides

#### **FLAMMABILITY PROPERTIES**

Flash Point [Method]: >110C (230F) [Base oil ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/A

#### **SECTION 6**

#### **ACCIDENTAL RELEASE MEASURES**

#### **NOTIFICATION PROCEDURES**

In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. In the event of a spill or accidental release, notify relevant authorities in accordance with all applicable regulations. US regulations require reporting releases of this material to the environment which exceed the applicable reportable quantity or oil spills which could reach any waterway including intermittent dry creeks. The National Response Center can be reached at (800)424-8802.

#### SPILL MANAGEMENT

Land Spill: Stop leak if you can do it without risk. Recover by pumping or with suitable absorbent.

Infineum D1282 Product Name:

Revision Date: 06Feb2008

Page 3 of 9

Warn other Water Spill: Stop leak if you can do it without risk. Confine the spill immediately with booms. Remove from the surface by skimming or with suitable absorbents. Seek the advice of a specialist before using dispersants.

Water spill and land spill recommendations are based on the most likely spill scenario for this material: however, geographic conditions, wind, temperature, (and in the case of a water spill) wave and current direction and speed may greatly influence the appropriate action to be taken. For this reason, local experts should be consulted. Note: Local regulations may prescribe or limit action to be taken.

#### **ENVIRONMENTAL PRECAUTIONS**

Large Spills: Dike far ahead of liquid spill for later recovery and disposal. Prevent entry into waterways, sewers, basements or confined areas.

#### **SECTION 7**

#### HANDLING AND STORAGE

#### **HANDLING**

Avoid contact with skin. This material is not intended for use in air compressors for breathing applications. Prevent small spills and leakage to avoid slip hazard. Products may load from Infineum manufacturing site above the standard loading/unloading range.

Loading/Unloading Temperature: 60°C (140°F) - 70°C (158°F)

Transport Temperature: N/D Transport Pressure: N/D

Static Accumulator:

This material is not a static accumulator.

#### **STORAGE**

Do not store in open or unlabelled containers. <= 70°C (158°F) **Storage Temperature:** 

Storage Pressure: N/D

Unsuitable Containers/Packing: Butadiene and styrene rubbers; Natural and butyl rubbers

#### **SECTION 8**

#### **EXPOSURE CONTROLS / PERSONAL PROTECTION**

Exposure limits/standards for materials that can be formed when handling this product: When mists / aerosols can occur, the following are recommended: 5 mg/m³ - ACGIH TLV, 10 mg/m³ - ACGIH STEL, 5 mg/m³ - OSHA PEL.

NOTE: Limits/standards shown for guidance only. Follow applicable regulations.

#### **ENGINEERING CONTROLS**

The level of protection and types of controls necessary will vary depending upon potential exposure conditions.

Revision Date: 06Feb2008

Page 4 of 9

Control measures to consider:

No special requirements under ordinary conditions of use and with adequate ventilation.

#### PERSONAL PROTECTION

Personal protective equipment selections vary based on potential exposure conditions such as applications, handling practices, concentration and ventilation. Information on the selection of protective equipment for use with this material, as provided below, is based upon intended, normal usage.

**Respiratory Protection:** If engineering controls do not maintain airborne contaminant concentrations at a level which is adequate to protect worker health, an approved respirator may be appropriate. Respirator selection, use, and maintenance must be in accordance with regulatory requirements, if applicable. Types of respirators to be considered for this material include:

No special requirements under ordinary conditions of use and with adequate ventilation.

For high airborne concentrations, use an approved supplied-air respirator, operated in positive pressure mode. Supplied air respirators with an escape bottle may be appropriate when oxygen levels are inadequate, gas/vapor warning properties are poor, or if air purifying filter capacity/rating may be exceeded.

**Hand Protection:** Any specific glove information provided is based on published literature and glove manufacturer data. Glove suitability and breakthrough time will differ depending on the specific use conditions. Contact the glove manufacturer for specific advice on glove selection and breakthrough times for your use conditions. Inspect and replace worn or damaged gloves. The types of gloves to be considered for this material include:

Thermally protective, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves. If prolonged or repeated contact is likely, chemical resistant gloves are recommended. If contact with forearms is likely, wear gauntlet style gloves.

**Eye Protection:** If contact is likely, safety glasses with side shields are recommended. If contact with material may occur, safety glasses and face shield are recommended.

**Skin and Body Protection:** Any specific clothing information provided is based on published literature or manufacturer data. The types of clothing to be considered for this material include:

If prolonged or repeated contact is likely, chemical, and oil resistant clothing is recommended. If product is hot, thermally protective, chemical resistant apron and long sleeves are recommended.

**Specific Hygiene Measures:** Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

#### **ENVIRONMENTAL CONTROLS**

See Sections 6, 7, 12, 13.

#### **SECTION 9**

#### PHYSICAL AND CHEMICAL PROPERTIES

Typical physical and chemical properties are given below. Consult the Supplier in Section 1 for additional data.

Revision Date: 06Feb2008

Page 5 of 9

**GENERAL INFORMATION** 

Physical State: Liquid Color: Clear and Bright

Odor: N/D

Odor Threshold: N/D

IMPORTANT HEALTH, SAFETY, AND ENVIRONMENTAL INFORMATION

Relative Density (at 60 F): 0.911

**Density (at 15 °C):** 911 kg/m³ (7.6 lbs/gal, 0.91 kg/dm³)

Flash Point [Method]: >110C (230F) [Base oil ASTM D-92]

Flammable Limits (Approximate volume % in air): LEL: N/D UEL: N/D

Autoignition Temperature: N/A
Boiling Point / Range: N/A
Vapor Density (Air = 1): N/D
Vapor Pressure: [Negligible]

Evaporation Rate (n-butyl acetate = 1): [Negligible]

pH: N/A

Log Pow (n-Octanol/Water Partition Coefficient): N/A

Solubility in Water: Negligible

Viscosity: 4238 cSt (4238 mm2/sec) at 40 C [Typical] | 190 cSt (190 mm2/sec) at 100C

Oxidizing Properties: See Sections 3, 15, 16.

OTHER INFORMATION

Freezing Point: N/A Melting Point: N/A

Pour Point:  $< 0^{\circ}C$  (32°F)

Hygroscopic: No

Coefficient of Thermal Expansion: 0.00069 V/VDEGC

**Decomposition Temperature:** N/A

**SECTION 10** 

STABILITY AND REACTIVITY

**STABILITY:** Material is stable under normal conditions.

**CONDITIONS TO AVOID:** Excessive heat.

MATERIALS TO AVOID: Strong oxidizers

**HAZARDOUS DECOMPOSITION PRODUCTS:** Material does not decompose at ambient temperatures.

HAZARDOUS POLYMERIZATION: Will not occur.

**SECTION 11** 

TOXICOLOGICAL INFORMATION

**ACUTE TOXICITY** 

Route of Exposure	Conclusion / Remarks	
Inhalation		
Toxicity: LC50 > 5 mg/l	Minimally Toxic.	
Irritation: No end point data.	Elevated temperatures or mechanical action may form vapors,	
·	mist, or fumes which may be irritating to the eyes, nose, throat, or

#### **SECTION 12**

#### **ECOLOGICAL INFORMATION**

The information given is based on data available for the material, the components of the material, and similar materials.

#### **ECOTOXICITY**

Material -- Not expected to be harmful to aquatic organisms.

#### **MOBILITY**

A component -- Low solubility and floats and is expected to migrate from water to the land. Expected to partition to sediment and wastewater solids.

#### PERSISTENCE AND DEGRADABILITY

#### **Biodegradation:**

A component -- Expected to be inherently biodegradable

#### **SECTION 13**

#### **DISPOSAL CONSIDERATIONS**

Disposal recommendations based on material as supplied. Disposal must be in accordance with current applicable laws and regulations, and material characteristics at time of disposal.

#### **DISPOSAL RECOMMENDATIONS**

Product is suitable for burning in an enclosed controlled burner for fuel value or disposal by supervised

Revision Date: 06Feb2008

Page 7 of 9

incineration at very high temperatures to prevent formation of undesirable combustion products.

#### REGULATORY DISPOSAL INFORMATION

RCRA Information: The unused product, in our opinion, is not specifically listed by the EPA as a hazardous waste (40 CFR, Part 261D), nor is it formulated to contain materials which are listed as hazardous wastes. It does not exhibit the hazardous characteristics of ignitability, corrositivity or reactivity and is not formulated with contaminants as determined by the Toxicity Characteristic Leaching Procedure (TCLP). However, used product may be regulated.

**Empty Container Warning** Empty Container Warning (where applicable): Empty containers may contain residue and can be dangerous. Do not attempt to refill or clean containers without proper instructions. Empty drums should be completely drained and safely stored until appropriately reconditioned or disposed. Empty containers should be taken for recycling, recovery, or disposal through suitably qualified or licensed contractor and in accordance with governmental regulations. DO NOT PRESSURISE, CUT, WELD, BRAZE, SOLDER, DRILL, GRIND, OR EXPOSE SUCH CONTAINERS TO HEAT, FLAME, SPARKS, STATIC ELECTRICITY, OR OTHER SOURCES OF IGNITION. THEY MAY EXPLODE AND CAUSE INJURY OR DEATH.

#### **SECTION 14**

#### TRANSPORT INFORMATION

LAND (DOT): Not Regulated for Land Transport

LAND (TDG): Not Regulated for Land Transport

SEA (IMDG): Not Regulated for Sea Transport according to IMDG-Code

AIR (IATA): Not Regulated for Air Transport

#### **SECTION 15**

#### REGULATORY INFORMATION

**OSHA HAZARD COMMUNICATION STANDARD:** When used for its intended purposes, this material is not classified as hazardous in accordance with OSHA 29 CFR 1910.1200.

NATIONAL CHEMICAL INVENTORY LISTING: AICS, TSCA, PICCS, IECSC, ENCS, KECI, EINECS, DSL

**EPCRA:** This material contains no extremely hazardous substances.

SARA (311/312) REPORTABLE HAZARD CATEGORIES: None.

**SARA (313) TOXIC RELEASE INVENTORY:** This material contains no chemicals subject to the supplier notification requirements of the SARA 313 Toxic Release Program.

#### Matt.

We have some more products for you to review. Hopefully the information below will be helpful to you. Both Brian and myself are on vacation tomorrow. I will be in Houston for the next 2 weeks, with limited access to email. So any questions please contact Brian. He will also be in Houston next Tues thru Thurs. I heard you may be joining us for the Astros game. Should be fun.

RE: drums

Nick,

We can accept both of these materials as product.

For the Polyamine drums go, we will need to charge \$60/drum for this material. This is because the only market I have for this is a non-hazardous fuel into a cement kiln. They only pay us enough for the material to cover the freight. We will still have the labor to consolidate in a trailer and deal with the empty drums.

For the Infineum D1282, we can pay \$.10/gallon for this material. We would normally be able to pay a higher price. However, due to the viscocity of this material, we will have to heat these drums prior to fuel blending. Additionally, all the drum will have to be shredded and disposed due to the amount of glue like material that will remain once we have emptied them.

Please let me know if you would like for me to proceed moving forward in setting up profiles for this material.

Regards,

Matt

P.S. Travis has invited me to the game next week with you guys. I look forward to a fun evening!

**To:** Barboza, Nicholas **Cc:** Codd, Brian **Subject:** RE: drums

Nick,

I had a couple of questions on both products.

On the Infinium D1282, what is the basic chemical composition of the material? What do expect the ash value will be? Is the viscocity of this material close to Mayonaise?

On the Heavy Polyamine, it appears that this material is 100% water soluable....what would the pH be on a mixture of it with water? What is the basic chemical composition of this material (e.g. is it only polyamines or does it contain water or other compounds, what is the typical carbon chain number)?

Have you found out what other drums you need to send...based on the previous email?

Subject: drums

#### Matt,

You could take a preliminary look at the attached MSDS's to see if there are any issues. We have 24 drums of the Heavy Polyamine and 40 drums of the D1282. These drums would be coming from Linden. We also think we have another 54 drums of a different product in Houston which we may want you to take a look at soon. <<HEAVY\_POLYAMINE MSDS.rtf>> <<INFINEUM\_D1282 MSDS.rtf>>

#### **Viscometers**

Use viscometers to measure the viscosity of various fluids including adhesives, paints, lubricating oils, varnishes, pastes, gels, syrups, and candy coatings.

#### **Definitions**

Newtonian Fluid: Viscosity remains constant with a change in shear rate. Examples: water, paint, solvents.

Non-Newtonian Fluid: Viscosity varies with a change in shear rate. Examples: catsup, batters, inks.

Absolute Viscosity: Viscosity of a Newtonian fluid under given conditions. Absolute viscosity = kinematic viscosity x density.

**Density:** Units of specific gravity or g/mL (e.g. poise = stokes x g/mL)

**Apparent Viscosity:** Viscosity of a non-Newtonian fluid under given conditions.

Kinematic Viscosity; Absolute viscosity/density.

**Polse:** Unit of absolute viscosity, abbreviated "p". Equivalent to stoke x specific gravity. A centipolse is 0.01 p. Polse = g/s x cm.

**Stoke:** Unit of kinematic viscosity; abbreviated "St". A centistoke is 0.01 St. Stoke =  $g/s \times cm \times density$  (temperature in °F).

		34-4	
Centipoise*	Centistokes	Saybolt Second	Typical ka
(cp)	(cSt)	Universal (SSU)	
1	1	31	Water
32	4	40	Nilk
12,6	15.7	80	No. ⊈ fuel oil
16,5	20.6	100	Cream
34.6	43.2	200	Vegetable oil
88	110	500	SAE 10 oil
176	220	1000	Tomato juice
352	440	2000	
880	1100	5000	Glycerine
15 <b>6</b> 1	1735	8000	SAE 50 oil
1760	2200	10,000	Honey
3000	4500	20,000	Glue
5000	6250	28,000	Mayon <b>naise</b>
8640	10,800	50,000	Molasses B
15,200	19,000	86,000	Sour cream
17,640	19,600	90,000	SAE 70 oil

\*Centipolse = centistokes x specific gravity where specific gravity is assumed to be 0.8 (except for water). To find the exact cp of your fluid: cp = cSt x (weight per gallon x = 0.120).

#### Ken,

I sent this to Matt sometime ago, but in might have been lost in the transitioning period when you took over. Please review the products and let us know if you can take them. One change is C9409 actually has 59 drums now. If prioritizing we would prefer to get rid of the F7589 and C9409 first. We have a list of more products as well which I am currently compiling.

Thanks. Regards.

RE: drums

Nick,

We can accept both of these materials as product.

For the Polyamine drums go, we will need to charge \$60/drum for this material. This is because the only market I have for this is a non-hazardous fuel into a cement kiln. They only pay us enough for the material to cover the freight. We will still have the labor to consolidate in a trailer and deal with the empty drums.

For the Infineum D1282, we can pay \$.10/gallon for this material. We would normally be able to pay a higher price. However, due to the viscocity of this material, we will have to heat these drums prior to fuel blending. Additionally, all the drum will have to be shredded and disposed due to the amount of glue like material that will remain once we have emptied them.

Please let me know if you would like for me to proceed moving forward in setting up profiles for this material.

Regards, Matt

P.S. Travis has invited me to the game next week with you guys. I look forward to a fun evening!

Matt,

The pH = 11.58 for the heavy polyamine. The sample was mixed 1:1 and shaken well.

**To:** Barboza, Nicholas **Cc:** Codd, Brian **Subject:** RE: drums

Nick.

I had a couple of questions on both products.

On the Infinium D1282, what is the basic chemical composition of the material? What do expect the ash value will be? Is the viscocity of this material close to Mayonaise?

On the Heavy Polyamine, it appears that this material is 100% water soluable....what would the pH be on a mixture of it with water? What is the basic chemical composition of this material (e.g. is it only polyamines or does it contain water or other compounds, what is the typical carbon chain number)?

Have you found out what other drums you need to send...based on the previous email?

#### Matt,

You could take a preliminary look at the attached MSDS's to see if there are any issues. We have 24 drums of the Heavy Polyamine and 40 drums of the D1282. These drums would be coming from Linden. We also think we have another 54 drums of a different product in Houston which we may want you to take a look at soon. <<HEAVY\_POLYAMINE MSDS.rtf>> <<INFINEUM\_D1282 MSDS.rtf>>

#### Ken.

I sent this to Matt sometime ago, but in might have been lost in the transitioning period when you took over. Please review the products and let us know if you can take them. One change is C9409 actually has 59 drums now. If prioritizing we would prefer to get rid of the F7589 and C9409 first. We have a list of more products as well which I am currently compiling.

Thanks. Regards,

Ken.

From the below products we have shipped all the C9409 -- 58 drums and F7589 -- 22 drums. That leaves 11 drums of the F7589 and the rest of the products below. We plan on trying to ship out the rest of the list sometime next week. We also have more products we would like some pricing on. I will send you the new list shortly.

Thanks,

Nick

### Waste Pre-Acceptance/Approval Letter

Date 4/18/2008

Dear Mark Broome

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # 2737

Expiration Date 4/18/2010

Generator: Ineos Polymers

Address: 1230 Battleground Road

La Porte, TX 77571

Waste Information

Name of Waste: Base oil

TCEQ Waste Code #: Product

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Line flush base oil

Color: dark brown

**Odor:** hydrocarbon

**pH:** 7-11

**Physical State:** 

**Incompatibilities:** oxidizers

Safety Related Data/Special Handling:

std

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

## Waste Pre-Acceptance/Approval Letter

Date 9/30/2008

Dear Mark Broome

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3011

Expiration Date 9/30/2010

**Generator:** Ineos Polymers

Address: 1230 Battleground Road

La Porte, TX 77571

Waste Information

Name of Waste: Antifreeze TCEQ Waste Code #: Recycle

**Container Type:** 

**Detailed Description of Process Generating Waste:** 

Equipment maintenance

Color: green

Odor: antifreeze/glycol

**pH:** 3-11

**Physical State:** 

Incompatibilities: na

Safety Related Data/Special Handling:

na

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

<u>s</u>	ECTION 10: Waste Receipt Cle ication Under 40 CFR 437
Įs	s this material a wastewater or wastewater sludge?   YES   NO
L	f 'Yes', complete this section.
P	LEASE CHECK THE APPROPRIATE BOX. IF NO APPROPRIATE CATEGORY, GO TO THE NEXT PAGE.
<u>Met</u>	als Subcategory: Subpart A
	Spent electroplating baths and/or sludges Metal finishing rinse water and sludges Chromate wastes Air pollution control blow down water and sludges Spent anodizing solutions Incincration wastewaters Waste liquid mercury Cyanide-containing wastes greater than 136 mg/l Waste acids and bases with or without metals Cleaning, rinsing, and surface preparation solutions from electroplating or phosphating operations Vibratory deburring wastewater Alkaline and acid solutions used to clean metal parts or equipment
<u>Oils</u>	Subcategory: Subpart B
	Used oils Oil-water emulsions or mixtures Lubricants Coolants Contaminated groundwater clean-up from petroleum sources Used petroleum products Oil spill clean-up Bilge water
	Rinse/wash waters from petroleum sources Interceptor wastes Off-specification fuels Underground storage remediation waste Tank clean-out from petroleum or oily sources Non-contact used glycols Aqueous and oil mixtures from parts cleaning operations Wastewater from oil bearing paint washes
Orga	nics Subcategory: Subpart C
	Landfill leachate Contaminated groundwater clean-up from non-petroleum sources Solvent-bearing wastes Off-specification organic product Still bottoms Byproduct waste glycol Wastewater from paint washes Wastewater from adhesives and/or epoxies formulation Wastewater from organic chemical product operations Tank clean-out from organic, non-petroleum sources

(1) If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcategory.
(2) If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory.
Cadmium: 0.2 mg/L
Chromium: 8.9 mg/L
Copper: 4.9 mg/L
Nickel: 37.5 mg/L
(3) If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper, or nickel above any of the values listed above, the waste should be classified in the organics subcategory.
Metals Subcategory

### SECTION 11: Additional Instructions

Oils Subcategory

Organics Subcategory

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease. CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

Juanita Thomas

Subject:

FW: INEOS Invoicing and Manifests

Juanita,

Umbiella Po# for 2007

The PO number is current. 4550025209-10 INEOS Polyethylene 4550025209-20 INEOS Polymers

Mark

From: Broome, Mark
Sent: Thursday, October 11, 2007 11:57 AM 'jthomas@cesenvironmental.com' Subject: FW: INEOS Invoicing and Manifests

It was nice talking to you Juanita. Thank you for your help.

Mark

From: Broome, Mark

Sent: Thursday, October 11, 2007 11:23 AM Subject: INEOS Invoicing and Manifests

Contrary to the recent directive requesting invoices be sent to the INEOS Nasa Road 1, League City, Texas address, please continue sending invoices and shipping documents to:

INEOS Polyethylene NA 1230 Battleground Road La Porte, TX 77571 Mail Drop 34

Attention: Mark Broome

INEOS Polymers, Inc. 1230 Battleground Road La Porte, TX 77571 Mail Drop 34

Attention: Mark Broome

If you have any questions concerning this, please call.

Thank you,

#### Mark Broome

**Environmental Engineer** Ph: 713 307 3470 Pager: 713 279 2852 Fax: 713 307 3007 Cell: 832 613 1966

mark.broome@innovene.com

They not Sean didn't charge them we had told them we them we had a get them we them back I when we pass) preh up the pass) upsetting them went for

SECTI	ON 10: Waste Receipt Classification Under 40 CFR 437
ls this	material a wastewater or wastewater sludge? YES VO
If 'YES	S', complete this section
PLEA:	SE CHECK THE APPROPRIATE BOX: IF NO APPROPRIATE CATEGORY, GO TO THE NEXT PAGE
Matals	s Subcategory: Subpart A
	Spent electroplating baths and/or sludges
	Metal finishing rinse water and sludges
	Chromate wastes
	Air pollution control blow down water and sludges
	Spent anodizing solutions
	Incineration wastewaters
	Waste liquid mercury
	Cyanide-containing wastes greater than 136 mg/l
	Waste acids and bases with or without metals
	Cleaning, rinsing, and surface preparation solutions from electroplating or phospha
	Vibratory deburring wastewater
	Alkaline and acid solutions used to clean metal parts or equipment
011 0	A track D
Oils S	ubcategory: Subpart B Used oils
	Oil-water emulsions or mixtures
	Lubricants
	Coolants
	Contaminated groundwater clean-up from petroleum sources
	Used petroleum products
	Oil spill clean-up
	Bilge water
	Rinse/wash waters from petroleum sources
	Interceptor wastes
	Off-specification fuels
	Underground storage remediation wastes
	Tank clean-out from petroleum or oily sources
	Non-contact used glycols
	Aqueous and oil mixtures from parts cleaning operations
	Wastewater from oil bearing paint washes
<u>Organ</u>	ics Subcategory Subpart C
	Landfill leachate
_	Contaminated groundwater clean-up from non-petroleum sources
	Solvent-bering wastes Off analytication arganic product
	Off-specification organic product Still bottoms
_	
	Byproduct waste glycol Wastewater from paint washes
	Wastewater from adhesive and/or epoxies formulation
	Wastewater from organic chemical product operations
	Tank clean-out from organic, non-petroleum sources
	rank dean-out from organic, non-penoleum sources

(1)	If the waste contains oil and grease at or in excess of 100 mg/L, the waste should be classified in the oils subcategory
(2)	If the waste contains oil and grease less than 100 mg/L, and has any of the pollutants listed below in concentrations in excess of the values listed below, the waste should be classified in the metals subcategory
	Cadmium: 0.2 mg/L Chromium: 8.9 mg/L Copper: 4.9 mg/L Nickel: 37.5 mg/L
(3)	If the waste contains oil and grease less than 100 mg/L, and does not have concentrations of cadmium, chromium, copper or nickel above any of the values listed above, the waste should be classified in the organics subcategory.
	☐ Metals Subcatego
	Oils Subcatego
	☐ Organics Subcategory

#### **SECTION 11: Additional Instructions**

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

CES Environmental Services Inc. 4904 Griggs Road Houston, Texas 77021

Attn: Field Coordinator for 302 McCarty Dr. work

To Whom It May Concern:

Tenaris/Hydril on April 21, 2009 presented Big M Constructors with your invoice #52805 in the amount of \$2,266.41. Your invoice is dated December 23, 2008. They want us to take care of this matter.

Big M Constructors located at 10200 Windfern Road, Houston, Texas 77064, worked as the general contractor and, used our employees to load out your roll-off boxes.

Big M supervisor, Earl Christensen, completed the load-ups using Big M's equipment. In general, see his attached comments where he answered all of your claims.

Earl did not receive any, not one, complaint from your drivers at the job site. Big M believes the request is not correct. Please review your request and let us know at Big M. The cost was never calculated into our lump sum amount.

Your answers and help are requested.

Thanks.

Bruno J. Maciejeski, P.E. President

BJM/bc

Invoice #52805 from CES Environmental Services, Inc. attached

Statement from Earl Christensen attached

10200 WINDFERN ROAD • HOUSTON, TEXAS 77064 (281) 469-9770 • FAX: (281) 469-9776 all Dump sters were covered after loading and Nove of the tarps were doinged at this time. Some of the Ratchets were unseable. Some straps were short but still useable. No complant from the Dumpster loaders. The bows were taken out I the Replaced after-loading & 4-21-09.

RE: Hydril soil pricing

They did all the excavation work themselves. Rfr provided 5 boxes, and we provided one. Please add \$15/day/box for rental. Plus \$70/hr for trans on disposal +fsc. \$35/liner (each box was lined). \$175/washout if needed. Rfr trans for delivery or pick-up i am guessing we will need to charge \$85/hr on. Joy

Subject: Hydril soil pricing

Joy,

Do you have a quote on this job?

The only thing on the P&L sheet is disposal @ \$60./yd.

Need help! Melba

Title:

Project Manager

Date:

10/28/2008

This Laboratory is NELAP (T104704213-08-TX) accredited. Effective: 07/01/2008; Expires: 06/03/2009

Scope: Non-Potable Water, Drinking Water, Air, Solid, Hazardous Waste

I am the laboratory manager, or his/her designee, and I am responsible for the release of this data package. This laboratory data package has been reviewed and is complete and technically compliant with the requirements of the methods used, except where noted in the attached exception reports. I affirm, to the best of my knowledge that all problems/anomalies observed by this laboratory (and if applicable, any and all laboratories subcontracted through this laboratory) that might affect the quality of the data, have been identified in the Laboratory Review Checklist, and that no information or data have been knowingly withheld that would affect the quality of the data.

This report cannot be reproduced, except in full, without prior written permission of A&B Labs. Results shown relate only to the items tested. Samples are assumed to be in acceptable condition unless otherwise noted. Blank correction is not made unless otherwise noted. Air concentrations reported are based on field sampling information provided by client.

Date Received: 10/23/2008 15:44

### Waste Pre-Acceptance/Approval Letter

7/25/2005

Mrs. Lacy Rosson,

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

**Profile #: 1063** 

Generator: <u>Hydril-McCarty</u>

Address: 302 McCarty Street, Houston, TX 77029

Name of Waste: Zinc Phosphate Sludge TCEQ Waste Code Number: 00133161

#### Waste Information

Container Type: Drum

Detailed description of process generating waste: Removal of phosphate sludge from

dip tanks

Color: <u>Tan-Brown</u>

Odor: None

pH: <u>3-11</u>

Physical State: <u>Liquid; Sludge; Solid</u>

Incompatibilities: None Known

Safety Related Data/Special Handling: Standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

### Waste Pre-Acceptance/Approval Letter

7/25/2005

Mrs. Lacy Rosson,

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

**Profile #: 1062** 

Generator: <u>Hydril-McCarty</u>

Address: 302 McCarty Street, Houston, TX 77029

Name of Waste: Oil Filters

TCEQ Waste Code Number: Recyclable

Waste Information

Container Type: Drum

Detailed description of process generating waste: Removal of used oil filters

Color: Varies

Odor: <u>Hydrocarbon</u>

pH: <u>N/A</u>

Physical State: <u>Liquid</u>; <u>Solid</u> Incompatibilities: None Known

Safety Related Data/Special Handling: Standard PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

SECTION 4: Physical and Chemical Data

COMPONENTS TABLE  The waste consists of the following materials	Concentration  Rauges are accep…ile	Units or %
Used Oil Filters	100	%
		1

<u>SECTION 5:</u>	Safety !	<u>Related</u>	<u>Data</u>

If the handling of this waste requires the use of special protective equipment, please explain. None

#### SECTION 6: Attached Supporting Documents

List all documents, notes, data, and/or analysis attached to this form as part of the waste approval package. N/A

#### **SECTION 7: Incompatibilities**

Please list all incompatibilities (if any):

None

#### SECTION 8: Generator's Knowledge Documentation

Laboratory analysis of the hazardous waste characteristics, listed below, WAS NOT PERFORMED based upon the following generator knowledge:

TCLP Metals: TCLP Volatiles: Regulated under 40 CFR 279

Regulated under 40 CFR 279

TCLP Semi-Volatiles:

Regulated under 40 CFR 279 Regulated under 40 CFR 279

Reactivity: Corrosivity:

Regulated under 40 CFR 279

Ignitability:

Regulated under 40 CFR 279

#### SECTION 9: Generator's Certification

The information contained herein is based on Z generator knowledge and/or I analytical data. I hereby certify that the above and
attached description is complete and accurate to the best of my knowledge and ability to determine that no deliberate or willful
omissions of composition properties exist and that all known or suspected hazards have been disclosed. I certify that the materials
tested are representative of all materials described by this document.

Jul 22 05 03:34p

JUL-22-2005

If you cannot determine the correct subcategory in Section 9 and you did not furnish data for the concentration of Cadmium, Chromium, Copper, Nickel, and Oil and Grease, CES will send offsite to a commercial laboratory a sample to determine these concentrations. This will be prior to acceptance. The generator will be responsible for the cost of the analysis.

## Melba Stephens

From:

Joy Baker

Sent:

Wednesday, November 19, 2008 3:46 PM

To: Subject: Melba Stephens RE: Hydril HTC

Yes, please pass on.

From: Melba Stephens <mstephens@cesenvironmental.com>

**Sent:** Wednesday, November 19, 2008 3:45 PM **To:** Joy Baker <jbaker@cesenvironmental.com>

Subject: Hydril HTC

Joy,

I have received the last bill from R4R for the replacement box out at HTC Sandblast. (off rent) But, I also received a bill from R4R for repairs. Replaced 1 missing bow, crank handle, and bungee cords. Total \$131.25.

Do you want me to pass on the cost or add 20 % to Hydril?

Also, Jorge spent 4 hrs installing door gasket, which is usually billed out at \$65./hr.

Let me know what you want.

Thanks,

Melba

Greg Bowman; Matt Bowman

Subject:

Besway Right up

Importance:

High

**GREG, MATT** 

PLEASE REVIEW FOLLOWING RESPONSE TO BESWAY. LET ME HAVE YOUR FEEDBACK asap....... I plan to use this to reply to Scott' last email so we have a tack of agreement and logic.

<<<>>>

In response to David Wall's email (below) regarding Summons (Case File Number 08-446-IV) where Besway Systems, Inc. as plaintiff and CES Environmental Services, Inc. (CES) and Hydrocarbon Resources Recovery, LLC (HRR) as defendant; CES and HRR agree to following:

- CES via HRR to sell three loads of new methylene chloride product (distilled) to Meadows Group at the old product price of \$0.08/lb delivered to Besway's facility in Madison TN. Delivery of the shipments will be by mutual coordination and with efforts by both parties to complete in the shortest period of time possible. We suggest the next three available loads to be used. The first load to be shipped March 10<sup>th</sup>, 2008. Subsequent loads are expected to be ready no later than early April.
- Besway to dismiss with prejudice the Summons referenced above. This shall be made immediately and before any shipment of methylene chloride is made. In any event, dismissal shall be filed and completed no later than March 22, 2008 which is the date specified on the Summons. Meaning no further action will be pursued by Besway, and HRR and CES will have no further obligations. A copy of the filed dismissal as given by Besway to the State of Tennessee 20<sup>th</sup> Judicial District Chancellery Court (or official agent) shall be sent to HRR and CES via fax or email for confirmation. A hard copy via delivery service or US mail shall be sent to CES and HRR for record keeping purposes.
- Separate and apart from the completion of the bulleted items above, CES will offer to HRR which will offer to Meadows an option to purchase at least one load of methylene chloride product per month provided the following conditions are met:

o CES has the product available to sell.

o Pricing offered by CES will be based upon the then current market sales price and in line with CES sales of methylene chloride product to other customers.

o This monthly offer will be made through December 2008.

#### Scott.

Mark Faulkner at Besway called this afternoon. He appreciates the offer of three tank trucks of methylene chloride at the old pricing. After receipt of these three loads he requests the option to buy 1 load per month at the current market price for off-spec methylene chloride. For example, if CES has a customer paying \$.10/lb he would have the opportunity to match that price for 1 load per month. As stated in our contract, these transactions would take place through Meadows Group.

If CES and Hydrocarbon Resources are in agreement he is willing to drop the suit.

Let me know what you think.

David C. Wall The Meadows Group, LLC Phone 713-647-9878 Fax 713-647-9850 Cell 713-553-8020

Gary:

That sounds fine. Please insert this in your copy, sign and return to me.

Thanks.

Scott

Scott,
We can agree to the Confidentiality and Non-Circumvent agreement with the following provision. We would like to add the following to the end of the Non-Circumvention paragraph.
"In the case that Company currently does business or has done business in the last two years with customers or Vendors set out in Addendum "A", the Company agrees to not circumvent HHR for any specifically listed product or service that is listed in Addendum "A". All other products or services not listed, may be pursued by Company."
My point being, we do not want to be limited in the unlikely case that we are already selling some goods or service to companies that will be listed in addendum A. In this case, we certainly agree not to circumvent HHR to try to sell directly to them the methelene chloride (or other chemical you may want to list).
Let me know if you can agree to this. I look forward to working with you on this opportunity.
Best Regards,
Gary Lenertz

Scott,
I need to look over the CA to make sure we are alright with the restrictions. In general, we will support a CA that restricts us from selling MeCl to this end-user. My first review of this agreement, it looked broader than this.
Also, please note the supplier of this stream is getting ready to increase production. If all goes well, they may make as much as a truck every three to four days. This could start as early as next week.
I will review the agreement and give you my comments. We would like to do this business with you.
Regards,
Gary Lenertz

Gary & Kelli:

Looks like we have an option for the MeCl<sub>2</sub>. Price is \$0.06/lb. FOB delivered by you to our destination. Estimated transportation cost is \$2,500.00 by commercial carrier. I need to get the Confidentiality Agreement executed and returned so I can get the actual delivery location.

This would be for material with the below specs:

**Component** Sales Specification

Methylene Chloride Minimum 84 %

Methanol Maximum 9 %

Acetone Maximum 3 %

Hexane and Heptane Maximum 1 %

Toluene Maximum 2.5 %

Water Maximum 1.5 %

Other Maximum 0.3 %

Color As represented by sample prior to shipment.

Volume: 1 truckload per month.

to me.
Thanks.
Scott

#### **HYDROCARBON ENGINEERING WASTE WATER QUOTE**

Specs of the sample that we received from Ralph Jenkins:

TOC – 22,000 mg/L
Phenol – 40 ppm
Flash Point – 130F (hazardous)
pH – 7
Solids - < 1%
Nickel – 0.12 ppm
Zinc – 1.25 ppm

Using these specs we would set a base price of \$0.20/gallon plus a compliance fee of 1%.

\*\*\*The following surcharges would also apply when / if applicable:

TOC - \$.02/gallon for every 5,000 mg/L over 25,000 mg/L Phenol - \$.02/gallon for every 25 ppm over 50 ppm Solids - \$.01/gallon for every % over 2% Nickel – up to 2 ppm with no additional charge Zinc – up to 3 ppm with no additional charge

Please let us (Joe Camp or Jenny Rust) know if you would like to move forward with this and we will get a profile set up and sent over to you for you to sign. Then we will submit it to CES for final approval.

Thanks,

Joe Camp Account Manager

## **C**ERTIFIED **A**UTOMATED TRUCK SCALE

CAT SCALE COMPANY P.O. BOX 630 WALCOTT, IA 52773 (563) 284-6263 www.catscale.com

THE CAT SCALE GUARANTEE

The CAT Scale Company guarantees that our scales will give an accurate weight. What makes us different from other scale companies is that we back up our guarantee with cash. ©

#### "WEIGH WHAT WE SAY OR WE PAY"®

If you get an overweight fine from the state AFTER one of our CAT Scales showed a legal weight, we will immediately check our scale and we will:

(1) Reimburse you for the cost of the overweight fine if our scale is wrong, OR

(2) A representative of CAT Scale Company will appear in court WITH the driver as an expert witness if we believe our scale was correct.

## IF YOU SHOULD GET AN OVERWEIGHT FINE, YOU SHOULD DO THE FOLLOWING TO GET THE PROBLEM RESOLVED:

Post bond and request a court date. 1)

Call CAT Scale Company direct 24 hours a day at 1-877-CAT-SCALE (Toll Free). 2)

IMMEDIATELY send a copy of the citation, CAT Scale Ticket, your name, company, address, and phone number to CAT Scale Company Attn: Operations Manager.

\*The four weights shown below are separate weights. The GROSS WEIGHT is the CERTIFIED WEIGHT and was weighed on a full length platform scale. All weights are guaranteed.

THE CAT SCALE GUARANTEE

The CAT Scale Company guarantees that our scales will give an accurate weight. What makes us different from other scale companies is that we back up our guarantee with cash.©

#### "WEIGH WHAT WE SAY OR WE PAY"®

If you get an overweight fine from the state AFTER one of our CAT Scales showed a legal weight, we will immediately check our scale and we will:

(1) Reimburse you for the cost of the overweight fine if our scale is wrong, OR

(2) A representative of CAT Scale Company will appear in court WITH the driver as an expert witness if we believe our scale was correct.

#### IF YOU SHOULD GET AN OVERWEIGHT FINE, YOU SHOULD DO THE FOLLOWING TO GET THE PROBLEM RESOLVED:

Post bond and request a court date.

Call CAT Scale Company direct 24 hours a day at 1-877-CAT-SCALE (Toll Free).

IMMEDIATELY send a copy of the citation, CAT Scale Ticket, your name, company, address, and phone number to 2) 3) CAT Scale Company Attn: Operations Manager.

\*The four weights shown below are separate weights. The GROSS WEIGHT is the CERTIFIED WEIGHT and was weighed on a full length platform scale. All weights are guaranteed.

RE: Hydrocarbon Engineering

Jenny:

Can you get with Jayne and have her send their billing and generator address for the oily water material that Jay in the lab ran and he said we could take the stuff. The price is 35 cents per gallon, customer to deliver and the material will be a recyclable material. If you have any questions, please give me a call.

We will allow 10% solids and surcharge 3 cents per gallon for every 5% additional solids with a max of 55 cents per gallon.

**Thanks**

# Waste Pre-Acceptance/Approval Letter

Date 6/24/2009

Dear Ralph Jenkins

Thank you for choosing CES Environmental Services, Inc. for you waste disposal and/or recycling needs. The following waste stream has been approved at our facility in Houston, TX. If the waste received does not conform to the profile, then rejection or additional charges may apply.

CES Profile # HOU-3397

**Expiration Date** 6/23/2011

Generator: Hydrocarbons Engineering Processing Inc.

Address: 12 Lindo Lane

Natchez, MS 39122

Waste Information

Name of Waste: Oily water w/ aromatics

TCEQ Waste Code #: OUTS205H

Container Type:

**Detailed Description of Process Generating Waste:** 

material generated from equipment oil changes & cleanings

Color: light brown

**Odor:** hydrocarbon

**pH**: 5-9

Physical State: Incompatibilities:

Safety Related Data/Special Handling:

FLAMMABLE PPE

If you have any questions concerning this approval and/or the conditions, then please feel free to contact our office at (713) 676-1460.

Thank you,

Matt Bowman, President CES Environmental Services, Inc.

Wastewater from organic chemical product operations

Corrosivity:

Tank clean-out from organic, non-petroleum sources	
(1) If the waste contains oil and grease at or in excess of 100 i	ng/L, the waste should be classified in the oils subcategory
(2) If the waste contains oil and grease less than 100 mg/L, an excess of the values listed below, the waste should be clas	d has any of the pollutants listed below in concentrations in sified in the metals subcategory
Cadmium: 0.2 mg/L Chromium: 8.9 mg/L Copper: 4.9 mg/L Nickel: 37.5 mg/L	
(3) If the waste contains oil and grease less than 100 mg/L, an or nickel above any of the values listed above, the waste sh	d does not have concentrations of cadmium, chromium, copper, nould be classified in the organics subcategory.
☐ Metals Subcatego	
☑ Oils Subcatego	
☐ Organics Subcategory	
SECTION 10: Additional Instruction	
f you cannot determine the correct subcategory in Section 9 ar Chromium, Copper, Nickel, and Oil and Grease, CES will send concentrations. This will be prior to acceptance. The generator	offsite to a commercial laboratory a sample to determine these

#### Dear Valued Supplier:

Hyrochem Industrial Services, Inc. values your business. As we continue to improve our internal processes, we need your help in assuring that we process payments in a timely, efficient manner. It is mandatory that all invoices reference a HydroChem Industrial Services, Inc. purchase order before it is submitted for payment. Any invoice submitted without a valid purchase order number will be deemed non-payable and excluded from processing. We can no longer entertain invoices that do not recognize our minimum requirements for payment. Please share this information with the appropriate people throughout your organization. We value your partnership and look forward to continue calling on your services in the immediate future.

Sincerely,

Carlos Baker, C.P.M.

Corporate Procurement Manager

December 17, 2008

Dear Valued Supplier,

Our supplier partners have been and will continue to be an important element of our total supply chain. Your commitments to quality and on time delivery are essential elements for HydroChem's supply chains to effectively serve our customers. We appreciate your efforts to continuously improve overall product and service quality, service performance, cost and payment terms.

During the last few years, market conditions have experienced unprecedented volatility. As well as during this period, HydroChem has helped our supplier base cope with their increased costs by agreeing to accept price increases and energy surcharges.

The Global business environment has changed considerably over the last few months. Raw material pricing as well as energy prices have fallen dramatically. HydroChem is now looking at our valued suppliers to return the goodwill that we have shown them during the last few years.

HydroChem will adopt the following policies:

- 1. Effective January 1, 2009, HydroChem will not accept any price increases, energy surcharges or additional freight costs.
- 2. HydroChem will be approaching our valued suppliers to reduce their price as demand, energy, and manufacturing costs have significantly decreased. We expect each supplier to have a plan on how they will reduce their costs by January 30, 2009.

While potentially painful, these actions are necessary to support long-term sustainability and growth of both companies. HydroChem appreciates your continued cooperation and support. We look forward to working with you to find new ways to improve our collective productivity.

Sincerely

Carlos Baker
